```
#PROGRAM 15 REVERSE A NUMBER
############################

echo "Enter the number"
read num

while [ $num -ge 1 ]
do
    echo -e "`expr $num % 10`\c "
    # -e = It will enable the escape sequences.
# \c is suppressing a new line.
    num=`expr $num / 10`
done
echo

#    OUTPUT
#    user@ubuntu:~$ ./reverse.sh
#    Enter the number
#    245986
#    689542
```
